Chemistry contributes 25% of the value of material inputs used to make medical supplies.

**Intermediate Products**
- Chlorine
- Propylene
- Cumene
- BPA
- Polycarbonate resins
- Polypropylene
- Ethylene
- Benzene
- Styrene
- Polystyrene
- Diisocyanates
- Butadiene
- Vinyl chloride
- Polyvinyl chloride
- Ethylene oxide
- Methyl chloride
- Silicones
- Polyurethanes

**Oil & Gas, Minerals**
- Ethane, Propane, Naphtha, Ammonia, Methanol

**Chemical Plant**

**Test tubes, petri dishes**

**Syringes, surgical instruments**

**Clear IV components, dialysis filters**

**Goggles, surgical gloves, tubing, pouches**

**Rubber gloves**

**Syringes, surgical instruments**

**Housings for test kits**

**Elastic bandages, sterile packaging, tape adhesives**

**Goggles, surgical gloves, tubing, pouches**

**American Chemistry Council**
