

Industrial Gases: Illinois

SOLUTION PROVIDERS FOR A CHANGING WORLD

The American industrial gases industry plays a critical role in the state by providing essential products and services to manufacturers, healthcare providers and innovators that help drive the Illinois economy. Industrial gases producers use advanced technologies to supply gases like oxygen, nitrogen, argon and hydrogen. American industrial gases producers work to reduce their own energy footprint while providing products to other manufacturers that help make their industrial processes and consumer goods more sustainable and energy efficient.
