## AMERICAN CHEMISTRY COUNCIL APPROVES SIX NEW MEMBERS

WASHINGTON (February 4, 2021) – The American Chemistry Council’s (ACC) Board of Directors today approved the addition of four new Regular members as well as two Responsible Care® Partner companies, continuing to diversify ACC’s membership throughout the chemical manufacturing and distribution and logistics sectors.

Regular members approved today include:

- Arcanum Infrastructure, LLC, of Houston, TX. The company manufactures Butene-1, an olefin used in a variety of base chemical products, including as a co-monomer for production of polyethylene.
- CHEMRES, of Princeton, NJ, a specialized custom compounder, producing high-performance resins for medical devices and diagnostics, packaging, wire and cable, and industrial applications.
- EMD Performance Materials, of Allentown, PA, a leader in semiconductor and electronics materials, display and surface solutions, and specialty gases.
- Epsilyte LLC, of The Woodlands, TX, leaders in the manufacturing of expandable polystyrene.

Responsible Care® Partner companies approved today include:

- R&S Delivered (R&S), of St. Louis, MO. R&S is a third-party logistics company specializing in chemical packaged goods in the less than truckload (LTL) and dry van transportation sector.
- C Three Logistics (C3L), of Newfield, NJ. C3L is a bulk chemical product motor carrier.

“ACC’s continued growth reflects the vitality of the domestic chemical industry,” said ACC President and CEO Chris Jahn. “From chemistry’s unique role in [defeating COVID-19](#), to [combating climate change](#), to [improving sustainability](#) and [protecting the health and safety](#) of people worldwide, our members continue to prove that chemistry is the science behind sustainability and our products and technologies are essential to helping solve some of the world’s greatest challenges,” Jahn added.

*committed to improved environmental, health and safety performance through Responsible Care®; common sense advocacy designed to address major public policy issues; and health and environmental research and product testing. The business of chemistry is a \$565 billion enterprise and a key element of the nation's economy. It is among the largest exporters in the nation, accounting for ten percent of all U.S. goods exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation's critical infrastructure.*
