AMERICAN CHEMISTRY COUNCIL ELECTS NEW CLASS TO BOARD OF DIRECTORS

COLORADO SPRINGS, CO (June 7, 2019) – At its annual meeting this week the American Chemistry Council (ACC) approved twenty-three individuals to serve on its board of directors for new or extended terms beginning January 1, 2020.

“The expertise, knowledge, and product diversity reflected in our board of directors is a tremendous asset to ACC, ensuring that we remain the leading advocate for the chemical industry at all levels of government,” said ACC President and CEO Cal Dooley. “As the products of chemistry continue to come under attack, it’s more important than ever that we pursue a risk- and science-based approach to public policy, one that has the added benefit of showcasing how our products, technologies, and innovations are in fact the drivers of a more sustainable future, helping to address some of the world’s greatest challenges arising from a growing global population,” he added.

The ACC board of directors sets council policy, provides strategic direction, and approves advocacy priorities and the annual budget.

The following individuals were approved to serve on the ACC board of directors:

For a term beginning on January 1, 2020 and ending December 31, 2020:
- Dean Cordle, President and CEO, A, C & S, Incorporated
- Mark Kramer, President & CEO, Anderson Development Company

For terms beginning on January 1, 2020 and ending December 31, 2021:
- Inga Carus, Chairman, Carus Corporation
- Jim Owens, President and CEO, HB Fuller

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people's lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®, common sense advocacy designed to address major public policy issues, and health and environmental research and product testing. The business of chemistry is a $526 billion enterprise and a key element of the nation's economy. It is the nation’s largest exporter, accounting for ten percent of all U.S. exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation’s critical infrastructure.
