ACC LAUNCHES ADS HIGHLIGHTING SEN. MORAN AND REP. POMPEO
Ads focus on their teamwork fighting for Kansas industries

WASHINGTON (July 19, 2016) – The American Chemistry Council (ACC) announced today that it has launched advertisements commending Senator Jerry Moran (R-Kan.) and Congressman Mike Pompeo (R-Kan.-04) for their strong leadership in Congress and shared dedication to the agriculture and aviation industries in Kansas.

“Working together, Sen. Moran and Rep. Pompeo have been champions for our economy and industry overall. By supporting pro-business policies that keep taxes low, these conservative leaders have created an environment where family businesses can thrive,” explained ACC President and CEO Cal Dooley. “Kansas can rely on the combined leadership of Kansas’s Moran and Pompeo in Washington.”

“Kansas chemistry ships one billion dollars’ worth of products to customers around the world,” Dooley continued. “Because of chemistry’s impact in the state and as representatives of one of the nation’s largest manufacturing sectors, we believe their leadership in Congress will benefit our industry, job creators and the economy as a whole.”

The ads will run for two weeks in select markets in South-Central Kansas, primarily in Wichita and the surrounding areas, and encourage constituents to contact the offices of both the Senator and the Congressman to tell them to keep fighting for Kansas values.

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people’s lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®, common sense advocacy designed to address major public policy issues, and health and environmental research and product testing. The business of chemistry is a $797 billion enterprise and a key element of the nation’s economy. It is the nation’s largest exporter, accounting for fourteen percent of all U.S. exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation’s critical infrastructure.
