ACC LAUNCHES NEW WEB SITE ON SPRAY POLYURETHANE FOAM INSULATION AND INSULATING FOAM SEALANT

WASHINGTON, D.C. (Sept. 21, 2010) – The Center for the Polyurethanes Industry (CPI) of the American Chemistry Council (ACC), in cooperation with the Spray Polyurethane Foam Alliance, has launched its Spray Polyurethane Foam (SPF) Health and Safety Web site, www.spraypolyurethane.com. The site, intended for SPF contractors, weatherization professionals, do-it-yourselfers (DIYers), and homeowners, provides up-to-date information on the benefits and handling of SPF insulation and insulating foam sealant.

A wealth of guidance materials, posters and videos make the site a storehouse of information on SPF – product types, applications, benefits, and, most importantly, safe use and handling. The site is easy to navigate and organized by audience sector. Homeowners who are having SPF installed in their home, DIYers who plan to seal gaps and cracks with insulating foam sealant, and SPF professional and weatherization contractors will quickly find sections suited to their particular needs.

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people’s lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®, common sense advocacy designed to address major public policy issues, and health and environmental research and product testing. The business of chemistry is a $674 billion enterprise and a key element of the nation's economy. It is one of the nation’s largest exporters, accounting for ten cents out of every dollar in U.S. exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation’s critical infrastructure.

The Center for the Polyurethanes Industry (CPI) of the American Chemistry Council promotes the sustainable growth of the polyurethanes industry by identifying and managing issues that could impact the industry, in cooperation with user groups. Its members include the nation’s leading producers and distributors of chemicals and equipment used to make polyurethane and manufacture polyurethane products. CPI provides a single, strong and credible voice to advocate on behalf of the interests of the U.S. polyurethanes industry. The business of polyurethanes is a $50.9 billion enterprise, supports about 207,500 jobs, and is a key element of the nation’s economy.
