ACC RELEASES MAY 2020 RESIN PRODUCTION AND SALES STATISTICS

WASHINGTON (July 6, 2020) – U.S. production of major plastic resins totaled 7.4 billion pounds during May 2020, a decrease of 0.8 percent compared to the same month in 2019, according to statistics released today by the American Chemistry Council (ACC). Year-to-date production was 37.5 billion pounds, a 3.2 percent increase as compared to the same period in 2019.

Sales and captive (internal) use of major plastic resins totaled 7.4 billion pounds during May 2020, a decrease of 2.9 percent from the same month one year earlier. Year-to-date sales and captive use was 37.7 billion pounds, a 2.4 percent increase as compared to the same period in 2019.

Note: The ACC Plastics Industry Producers’ Statistics Group makes available detailed reports (including monthly production and end-use sales data for major thermoplastic and thermoset resins) to subscribers of its various services. For more information on subscriptions to the resin reports, please visit www.americanchemistry.com/resin-report-subscriptions.

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people's lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®; common sense advocacy designed to address major public policy issues; and health and environmental research and product testing. The business of chemistry is a $565 billion enterprise and a key element of the nation's economy. It is among the largest exporters in the nation, accounting for ten percent of all U.S. goods exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation’s critical infrastructure.
