AMERICAN CHEMISTRY COUNCIL WELCOMES FOUR NEW MEMBERS AND ONE NEW RESPONSIBLE CARE® PARTNER COMPANY

Washington, DC (November 9, 2018) – The American Chemistry Council’s (ACC) Board of Directors approved the addition of four new Regular members, as well as one new Responsible Care Partner company at its board of directors meeting today.

Regular members approved include:

- Earth Science Laboratories, Inc., an innovator in water treatment products for both municipal and recreational use.
- Jayhawk Fine Chemicals Corporation, a full-service, fine chemical custom manufacturing partnership.
- Nouryon, a global specialty chemicals leader that manufacturers everyday products such as paper, plastics, building materials, and personal care products.
- Oxiteno USA, a multinational chemical company that develops solutions that contribute to people’s quality of life and the sustainable evolution of society and the planet.

In addition to the member companies, ACC’s Board also approved a new Responsible Care Partner company, Transport Logix.

“We’re very pleased to welcome these new companies in to the ACC membership. Small and medium sized companies continue to drive ACC’s growth, a strong testament to the bottom line business value we provide as we advance the industry’s interests on critical policy issues such as trade, security, and effective and efficient implementation of TSCA implementation,” said ACC President and CEO Cal Dooley. “They join a strong and committed group of companies, dedicated to advancing our industry’s policy priorities and sustainability initiatives locally, nationally, and globally,” he added.

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people’s lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®; common sense advocacy designed to address major public policy issues; and health and environmental research and product testing. The business of chemistry is a $526 billion enterprise and a key element of the nation’s economy. It is among the largest exporters in the nation, accounting for ten percent of all U.S. goods exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation’s critical infrastructure.
