## ACC'S PLASTICS DIVISION WELCOMES NEW MEMBER, INEOS STYROLUTION

WASHINGTON, D.C. (January 12, 2021) – The American Chemistry Council (ACC)'s Plastics Division announced today its newest member, INEOS Styrolution America, LLC.

INEOS Styrolution is a leading global styrenics supplier, with a focus on styrene monomer, polystyrene, ABS Standard and styrenic specialties. With a wide product portfolio, they provide styrenic applications across a broad range of industries, including automotive, electronics, household, construction, toys/sports/leisure, healthcare, and packaging. INEOS Styrolution joins [ACC Plastics Division members](#) who are industry leaders committed to delivering benefits for communities in America and across the world.

“The Plastics Division is pleased to welcome INEOS Styrolution as our newest member. Our growing membership reflects our sector’s shared drive and focus on innovating and deploying solutions to society’s greatest challenges,” said Joshua Baca, vice president of ACC’s Plastics Division. “With the support of our members, we look forward to driving more [circular and sustainable solutions](#) to end plastic waste through increased alignment among key stakeholders.”

*The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people's lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®; common sense advocacy designed to address major public policy issues; and health and environmental research and product testing. The business of chemistry is a \$565 billion enterprise and a key element of the nation's economy. It is among the largest exporters in the nation, accounting for ten percent of all U.S. goods exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation's critical infrastructure.*
