CAPITOL HILL POLICYMAKERS TO HEAR FROM INSULATION LEADERS *Insulation Industry National Policy Forum to take place May 21-22 on Capitol Hill*

WASHINGTON (May 21, 2019) – The insulation industry is hosting the third-annual Insulation Industry National Policy Forum May 21-22 at the Liaison Capitol Hill Hotel in Washington, D.C. where organizations plan to engage with policymakers about the substantial contributions of the insulation industry, as well as its key priorities and challenges.

Participating organizations include: [American Chemistry Council's \(ACC\) Center for the Polyurethanes Industry \(CPI\)](#) and [Spray Foam Coalition \(SFC\)](#), [Cellulose Insulation Manufacturers Association \(CIMA\)](#), [Extruded Polystyrene Association \(XPSA\)](#), [Insulation Contractors Association of America \(ICAA\)](#), [National Insulation Association \(NIA\)](#), [North American Insulation Manufacturers Association \(NAIMA\)](#), [Polyisocyanurate Insulation Manufacturers Association \(PIMA\)](#), [Structural Insulated Panel Association \(SIPA\)](#) and their respective member companies.

The insulation industry has three key priorities it will focus on during the Policy Forum and beyond:

- Ensure federal infrastructure policies support the construction of energy efficient, resilient buildings;
- Address climate change through actions that increase the energy efficiency of buildings – perhaps the most cost effective opportunity for significant GHG reductions; and
- Support federal policies that promote a legally admitted, foreign-born workforce for the construction industry.

An [economic study](#) released by ACC this month on the contributions of insulation to the U.S. economy in 2018 reported the insulation industry – including the manufacture, distribution and installation of insulation – generates more than 550,000 jobs in the U.S. and more than \$33 billion in payrolls that support families and local communities around the country.

In addition, insulation manufacturing is a \$16 billion business and directly employs more than 39,000 people across 45 states. Indirectly, through its purchases of supplies, raw materials, equipment and services, insulation manufacturing supports an additional 57,400 jobs in supply-chain industries. Through the household spending of the wages and salaries paid to workers in insulation manufacturing and their suppliers, an additional 65,000 payroll-induced jobs are supported.

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people's lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®; common sense advocacy designed to address major public policy issues; and health and environmental research and product testing. The business of chemistry is a \$526 billion enterprise and a key element of the nation's economy. It is among the largest exporters in the nation, accounting for ten percent of all U.S. goods exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation's critical infrastructure.
