Congressman Randy Weber Receives Champion of Chemistry Award for the 116th Congress

KEMAH, TX (October 7, 2019) - Today the American Chemistry Council (ACC) recognized Congressman Randy Weber (TX-14) for his efforts to promote legislation that allows for growth and innovation in the field of chemistry.

“Since Rep. Weber was elected to Congress, he has been a strong supporter of the business of chemistry” said ACC President and CEO Cal Dooley. “He is an active member of the Chemistry Caucus and as a small business owner he has supported legislation to strengthen the economy of his district, community, and the business of chemistry. During his tenure, Rep. Weber has made regular visits to chemistry facilities to engage with the many constituents that work in the field, discussing important issues such as safety, sustainability, and trade.”

ACC established its Champion of Chemistry Awards program to recognize outstanding members of Congress who actively engage with the industry and its workforce and seek to advance constructive and sound public policy that promotes growth and innovation in the field of chemistry.

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people's lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®, common sense advocacy designed to address major public policy issues, and health and environmental research and product testing. The business of chemistry is a \$553 billion enterprise and a key element of the nation's economy. It is among the nation's largest exporter, accounting for ten percent of all U.S. exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation's critical infrastructure.
