## **INDUSTRY, LABOR LAUNCH ADS HIGHLIGHTING SEN. DEBBIE STABENOW**

*Ads focus on Stabenow's strong economic record*

WASHINGTON (November 20, 2017) – In a combined effort to showcase the positive work of Members of Congress, the [American Chemistry Council](#) (ACC) and [North America's Building Trades Unions](#) will run issue advertisements for Senator Debbie Stabenow (D-MI). The ads highlight Sen. Stabenow's leadership on economic issues that will help Michigan grow and prosper.

"Sen. Stabenow is dedicated to Michigan families, workers, and small businesses," explained ACC President and CEO Cal Dooley. "Michigan is one of the nation's largest chemical producing states, providing tens of thousands of jobs and shipping more than \$4 billion in products to customers around the world. Sen. Stabenow's strong leadership is enabling chemistry, one of the largest manufacturing sectors in the nation, to grow and support high-paying jobs for thousands of Michiganders."

The ads will run for 2 weeks throughout select markets in Michigan, primarily in Detroit and Grand Rapids and the surrounding areas, and encourage constituents to contact the Senator's office to tell her to keep fighting for Michigan values.

*The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people's lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®, common sense advocacy designed to address major public policy issues, and health and environmental research and product testing. The business of chemistry is a \$768 billion enterprise and a key element of the nation's economy. It is the nation's largest exporter, accounting for fourteen percent of all U.S. exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation's critical infrastructure.*
