Fact Sheet

Hydrogen Peroxide Transportation

The Panel’s position regarding shipment of hydrogen peroxide by air is that hydrogen peroxide should be shipped by air only if land or sea transport is NOT feasible and only by persons knowledgeable in hydrogen peroxide safe air shipping practices. The shipper should contact the manufacturer of the hydrogen peroxide for shipping and handling guidance including the use of proper packaging and maintenance of proper outage. The maximum concentration allowable for shipments of hydrogen peroxide by air is 40%. (International and U.S. transportation regulations prohibit air shipments of more than 40% hydrogen peroxide.) Hydrogen peroxide should only be shipped in specially regulated and designed air transport packaging to ensure sealing of contents. Please contact the manufacturer for additional information.

The American Chemistry Council (ACC) represents the leading companies engaged in the business of chemistry. ACC members apply the science of chemistry to make innovative products and services that make people's lives better, healthier and safer. ACC is committed to improved environmental, health and safety performance through Responsible Care®, common sense advocacy designed to address major public policy issues, and health and environmental research and product testing. The business of chemistry is a $674 billion enterprise and a key element of the nation's economy. It is one of the nation's largest exporters, accounting for ten cents out of every dollar in U.S. exports. Chemistry companies are among the largest investors in research and development. Safety and security have always been primary concerns of ACC members, and they have intensified their efforts, working closely with government agencies to improve security and to defend against any threat to the nation’s critical infrastructure.
