20 Years
Promoting Quality Lubricant Development

ACC Thanks You for Your Support

2012 marks the 20th anniversary of the publication of the American Chemistry Council Petroleum Additives Product Approval Code of Practice for the engine lubricant additives sector.

For 20 years, the Code of Practice has helped raise the standards of testing and performance of engine lubricants.

On behalf of the members of the American Chemistry Council’s Petroleum Additives Panel, thank you for demonstrating compliance with the code and your contributions to help meet this milestone. We look forward to working together for another 20 years!

Visit our website at AmericanChemistry.com/Code20 to learn more about the Code of Practice.
