

Product Approval Code of Practice Alert Bulletin

To: Practitioners of the ACC Product Approval Code of Practice

Date Issued: December 15, 2017

Re: Retroactive Engine Test Registration of the Sequence VH

The American Chemistry Council (ACC) Product Approval Protocol Task Group (PAPPTG) reached consensus to initiate retroactive registration of the Sequence VH engine test. The current test registration fee of \$150 per registered test will apply. This engine test should be appropriately displayed in all data summaries; including documents such as Candidate Data Packages (CDPs).

According to correspondence with the ASTM Sequence VH Surveillance Panel Chair, Sequence VH engine test stands were calibrated on May 4, 2017. Therefore PAPPTG reached consensus to retroactive registration for the Sequence VH through the ACC Monitoring Agency (ACC MA). Retroactive registration will be accepted through the ACC Monitoring Agency according to the instructions below.

Sequence VH Retroactive Registration Instructions:

- Test sponsors are permitted to request retroactive registration for operationally valid Sequence VH tests from January 2, 2018 through April 2, 2018.
- Only operationally valid Sequence VH tests that started in calibrated stands on or after May 4, 2017 through January 2, 2018 are acceptable for retroactive registration.
- Normal registration, as per the ACC Code of Practice, will be permitted for all Sequence VH tests starting on or after January 2, 2018.

NOTE: ACC Code Bulletins for the appropriate Appendices in the ACC Code of Practice will be issued in the very near future where information relevant to the Sequence VH.

Questions regarding the registration of the Sequence VH should be directed to the [ACC MA](#). Comments/Questions regarding this Alert Bulletin should be directed to the [ACC PAPPTG manager](#).
