

## Product Approval Code of Practice Alert Bulletin Clarification

**To: Practitioners of the ACC Product Approval Code of Practice**

**Date Issued: July 11, 2019**

**Re: Clarification to Retroactive Engine Test Registration - Sequence IVB**

This Alert Bulletin Clarification is specific to retroactive Sequence IVB registration described in the [Alert Bulletin originally issued on May 17, 2019](#). The American Chemistry Council (ACC) Product Approval Protocol Task Group (PAPPTG) reached consensus that retroactive registration is allowable for operationally valid Sequence IVB tests that started in calibrated stands on or after October 18, 2018 through May 31, 2019 regardless of viscosity grades.

Questions regarding retroactive registration of the Sequence IVB should be directed to the [ACC MA](#). Comments/Questions regarding this Alert Bulletin Clarification should be directed to the [ACC PAPPTG manager](#).
