

PU 107: Introduction to Surfactants, Catalysts and Additives

Catalysts

- i. What are Catalysts?
- ii. Catalyst Impact on Polyurethane Reaction
- iii. Catalyst Selectivity
- iv. Specialized Catalysts

Surfactants

- i. What are Surfactants?
- ii. How and Why Surfactants Work?
- iii. Surfactant Chemistry
- iv. Surfactants Tailored for Polyurethane Applications

Additives

- i. Business Units
- ii. Polyurethane Applications
- iii. Markets Served
- iv. The Liquid Colors and Additives
- v. The Carrier
- vi. The Pigments
- vii. Functional Additives
- viii. Carbon Black Liquid Dispersions
- ix. How We Measure Color?
- x. Metamerism
- xi. What's Around Colour?
- xii. Processing and Performance Additives
- xiii. How does Polyurethane Yellow?
- xiv. Processing and Performance Additives

Questions
